

List of Wood Pellet Manufacturers in Europe

December 2000

Version 2
compiled by Yumi Tilt

This is a list of all wood pellet manufacturers in Europe that I am aware of. It has been compiled in connection with a Master's thesis at Copenhagen Business School. The list includes manufacturers of wood pellets but not companies that merely supply wood pellets. Main sources are the lists of wood pellet manufactures and suppliers found on the web site of C.A.R.M.E.N. (the Coordinating Office for Renewable Raw Materials, a German organisation) and the ones found in "Industrial Network on Wood Pellets" (Malisius et al., 2000), and information obtained from national biomass organisations and the like. In order to confirm the list, as far as possible I have been in direct contact with the companies.

I am grateful for the help of the numerous contributors to this list. If you have further additions or corrections, these will be greatly appreciated.

Version 1
November 12, 2000.

Since version 1, thanks to responses, wood pellet manufacturers from France, Italy and Spain have now been added to the list. Furthermore, information such as telephone/fax numbers and production figures has been updated.

Version 2
December 24, 2000.
